Video surveillance monitoring throughout childcare facility

## Case Study: LTS IP Cameras Placed in Classroom Facility

### Introduction

Working families who need quality childcare can rely on one of the largest non-profit organizations to offer them comprehensive and development services. There are several programs and special initiatives emphasized in Central America that focus on early childhood development in classrooms. With 24 areas needing surveillance, having an IP solution was a fantastic way to future proof their needs for scalability and expansion. The request for security cameras to keep families and staff safe is crucial in the facilities.

## CASE STUDY

### Challenge

The scope of work will be to install dome cameras in all classrooms, and the main hallway of the facilities. Each of the 24 facilities were different in size and blue print, therefore the number of cameras needed varied. The challenge was staying within their budget while providing consistent quality work through the various building structures and size.

### Solution

After studying the details of each building infrastructure, the installer was able to provide one camera model solution that worked for all requirements for each facility. Each location used the same Platinum Professional Level 8 Channel NVR 1U, LTN8708-P8, with a different quantity of the Platinum Varifocal Vandal Dome Cameras 3.2MP, CMIP7233-S, and WD surveillance grade hard drive. This helped make the solutions easy to install, scalable, and intuitive to one VMS. The installer found it very easy and simple to configure with the built-in PoE feature for plug and play. Smallest facility used the Platinum Professional Level 8 Channel NVR 1U, LTN8708-P8, five Platinum Varifocal Vandal Dome Cameras 3.2MP, CMIP7233-S, a 6TB Western Digital Surveillance Grade Hard Drive.

### Featured Products:

(LTN8708-P8) Platinum Professional Level 8 Channel NVR 1U

(DHWD60PURX) Western Digital Surveillance Grade Hard Drive 6TB

(CMIP7233-S) Platinum Varifocal Vandal Dome IP Camera 3.2MP

### Results

The organization was very satisfied with the cameras and LTS support. They are able to easily train how to use the software. Since safety and security is a huge priority, they were also able to lock the NVR's securely into their network room on the storage rack. A job well done.
