Surveillance applied throughout the hotel to keep guests and the staff safe

Case Study: Big Hotel Chain Uses LTS IP Solution for Texas Location

Introduction

JW Marriott Houston Downtown eloquently carries the rich legacy of the city with technologically advanced guest rooms. From a security perspective, the ten story building needed surveillance to help keep customers and employees safe. The hotel wanted to take security to a whole new level using a LTS IP solution.

Challenge

LTS and the installer needed to make sure every aspect of the hotel was covered around the clock with surveillance.

The video solution included 120 IP cameras. The challenge for the project was cabling the cameras, they needed to run to the security monitoring station on the first floor. Plus, since this is an exquisite hotel, a clean installation was a must.

CASE STUDY

Solution

LTS used ten individual Platinum Enterprise Level 32 Channel NVRs 1.5U, LTN8832 that was positioned on each floor. It was easy to scale and expand the large amount of IP cameras because of the connection with the NVR. The entire hotel had a total of 120 Platinum IP Fixed Lens Dome Cameras 3.2MP, CMIP7432-28. They gave the hotel a clean and consistent look.

Featured Products:

(LTN8832) Platinum Enterprise Level 32 Channel NVR 1.5U

(CMIP7432-28) Platinum IP Fixed Lens Dome Camera 3.2MP

Results

A lot of planning went into this large project. All areas including: hallways, elevators, parking, and the lobby were covered by the LTS video solution. The hotel's security staff had no problems learning the system while monitoring every floor of the hotel. The project was a success.
